PROFESSIONAL SUMMARY

Flutter developer with a strong foundation in Dart and cross-platform mobile development. Skilled in UI/UX design, state management, and integrating APIs. I am passionate about building high-performance applications and eager to contribute to innovative projects.

TECHNICAL SKILLS

- Programming Languages: Dart, C++, Java, PHP
- Database: SQLite, Firebase, MySQL, SQLite
- Webservices: JSON, REST API
- Flutter, Firebase, Provider, Getx, Geo Locator, Google Map, etc.
- IDE: Android Studio, Visual Studio, VS Code
- Figma and UI/UX Design
- State management and app architecture.
- Debugging and Troubleshooting
- Version Control: Git & GitHub
- HTML, Bootstrap, Laravel

PERSONAL SKILLS

- Problem Solving
- Attention to Detail
- Adaptability
- Team Collaboration
- Time Management

EXPERIENCE AND PROJECTS

Weather App: a weather forecasting application using Flutter and Dart, integrated with the OpenWeather API to fetch real-time weather data.

Full Food Delivery App: A food delivery app made with Flutter x Firebase, pre-built, functional, and ready to go out of the box. This app has email authentication and backend already built in. The user can create an account, browse the menu, add to cart, and input card payment details. The order will then be placed and saved into Firebase for real-time live updates. The app will generate a receipt for the user as a summary of the order.

CERTIFICATIONS

- Completed a full Flutter development course by Wail Abu Hamza, covering state management (Provider, GetX), Firebase integration, and UI/UX best practices.
- HTML, CSS, and JavaScript.
- Flutter app development with efe

EDUCATION
